About me

I'm a fullstack web developer located in Stockholm, Sweden. I'm finishing my two-year Higher Vocational Education program, as a web developer with a focus on e-commerce, in May this year. Since October 2022, I've been doing my internship as a front end developer at Stryda (former G-Loot), where I've learned a lot about working with real projects and best practices. I have a background in service professions such as waiter and furniture salesman but has, since my bachelors degree in business economics 2017, worked more with administrative economics. I'm a curious person that loves to learn new things, solve complex problems, be creative and really feel that I'm developing. I would define myself as humble, focused, social and problem-solver.

Education

Web development with a focus on e-commerce
Medieinstitutet | 2021 - 2023

This is a full stack web developer education where I've learned things such as how to work with databases, build and integrate APIs, build responsive web sites, version control and work agile. The education includes both frontend and backend with a focus on e-commerce.

Courses (total 400 YH-points):

Completed:
- E- and M-commerce 10p
- Competence portfolio and entrepreneurship 10p
- Frontend 160p
- Work and project methodology 15p
- System development framework 30p
- Development towards e-commerce platforms 30p
- Database technology 20p
- System support and integration with 3rd party systems 30p
- System development 50p
- Internship 150p
- Thesis 30p

Ongoing:
- Internship 275p

Business administration bachelor's degree
Stockholms Universitet | 2014 - 2017

Focus: Finance
Bachelor's thesis: "Monday Effect at the Swedish Stock Market"
A study on how seasonal effects affect the Swedish stock market.

Natural Science
Östra Reals gymnasium | 2004 - 2007

Work experience

Frontend internship full time
Stryda | 2022-10-10 - ongoing

As an intern at Stryda (former G-Loot) I work in a team of developers with
different tasks, such as updating and improving the admin interface, creating
new features for the website and solving general bugs and issues. Every day I
work with tools such as React.js, Typescript, Tailwind, Git, Jira and Slack. In my
team of developers, we have an agile way of work, we have standup every day,
we do backlog refinements and we have daily contact with other departments of
the company to make sure our solutions work and to know what our next
priority is.

Board member and treasurer
Brf Strykugnen 4 | 2021 - ongoing

Economist and Salesman
Mio Försäljning AB | 2014 - ongoing

My work at Mio includes selling furniture, handling the administrative
economics, keeping in contact with suppliers, banks and other partners. I also
do internal training regarding sales, exports, furniture and the business system
Movex.

Waiter
Restaurang Croque | 2013 - 2014

Waiter
Snaps bar och bistro | 2010 - 2012
